All SVMCA Providers:

The drug boxes and IV kits will be recertified through the pharmacies on February 27th, 2015. All boxes and kits will need to be put through a pharmacy during the early morning hours.

The following are changes that will occur with this recertification:

1. The two midazolam (10mg/2ml) vials will be replaced with *four* 5mg/1ml vials. Although the concentration is the same, the change is being made so that our medications are consistent with the new MI-MEDIC dosing cards.
2. Ketamine 500mg/5ml will be added to the boxes to reflect its addition to the Excited Delirium protocol as a post-medical control option. Expect a short required training to be posted in the near future specific to ketamine.

There will be no changes to the ALS or BLS kits.

New drug boxes:

After compiling the votes and comments concerning new drug boxes, the Pelican briefcase style will be our new box. We hope to start ordering some of the new boxes before spring and replace some of the aging Plano boxes. It may take us a little while to replace the old boxes so please be kind to the old ones in the meantime.

If you have any questions or concerns, please feel free to contact our office.

A handwritten signature in black ink, appearing to read 'Eric Snidersich'.

Eric Snidersich, BS EMT-P
EMS Manager, SVMCA
